- 4" x 6" borderless photo printing in approximately 85 seconds

A Whole New Way to Print and Share Your Digital Photos.

The Selphy DS700 Compact Photo Printer completely changes the rules about viewing and printing photos. Unlike other photo printers, it connects directly to your TV with the included video cable, becoming part of your home entertainment system. You can view and print your digital images right in your living room, without a PC! In fact, you can print directly from a wide variety of memory cards¹, from a PictBridge compatible² digital camera or DV camcorder, or even print wirelessly with an infrared enabled mobile phone.³ Of course, Canon has included its popular Easy-PhotoPrint software, so with the DS700 connected to your PC you can retouch and enhance your photos in a snap. Whichever way you print, you'll produce long-lasting, 35mm-quality photos that are perfect for sharing and framing.

View photos on TV, print on the spot.

Now, you can view your photos with family and friends on your TV -- and print them right on the spot. To start the show, just insert a memory card containing your photos. Using the included remote control, you can zoom in, search for a photo by its shoot date, rotate images... and if someone says "I'd like a copy of that one," simply use the remote to print a beautiful 4" x 6" photograph in about 85 seconds*. With its small size and easy connectivity, the Selphy DS700 can even go with you when you visit family and friends. It's the new way to view, print and share your photos.

DIRECT PRINT

Specifications are subject to change without notice.

¹ Compatible memory cards include Compact Flash®, Micro Drive®, SD Card® and MultimediaCard, SmartMedia®, Memory Stick®, Memory Stick Pro & trade,™. The following can be used with the addition of a special adapter sold separately: xD-Picture Card™, Memory Stick Duo™, Memory Stick Duo Pro™ and miniSD Card™.

² For a listing of select Canon digital cameras and DV camcorders featuring Bubble Jet Direct or PictBridge direct printing technology visit www.canon.ca/digitalphotography. To determine if a non-Canon brand camera or camcorder is PictBridge compatible, please consult the manufacturer

³ JPEG files 3MB or smaller only. Requires mobile phone with IrDA port and support for iRMC version 1.1 protocol, with phone positioned no more than 7.9 inches from printer.

* Approx. 85-second print time when printing a 5-megapixel image direct from a memory card or digital camera on Canon Photo Paper Plus Glossy. Actual print speed may vary based on file size, image data, print mode and device that the printer is connected to.

** Resolution may vary based on printer driver setting. Ink droplet can be placed with a horizontal pitch of 1/4800 inch at minimum.

*** System requirements vary by application.
